二、完形填空(本题共15小题;每小题1分,满分15分)

请认真阅读下面短文,从短文后各题所给的A、B、C、D四个选项中,选出最佳选项。

Sometimes I'm really not sure whether there is love between my parents. They don't act in the romantic ways that I read in books or I see on TV. In their opinion, "I love you" is too luxurious (奢侈的) for them to __11__. Sending flowers to each other on Valentine's Day is even more impossible. And my father is easy to get angry.

One day, my mother was sewing a quilt(被子). I silently sat down beside her and looked at her.

"Is there love between you and Dad?" I asked her in a very low __12__.

My mother stopped her work and raised her head with __13__ in her eyes. She didn't answer immediately.

I was very worried __14__ I thought I had hurt her. But at last I heard my mother say the following words.

"Lily," she said, "Look at this thread. Sometimes it appears, but most of it disappears in the quilt. The thread really makes the quilt strong and durable(耐用的). If life is a quilt, then love should be a __15__. It can hardly be seen anywhere or anytime, but it's really there. Love is

__16__."

I listened carefully but I couldn't understand her until the next spring. At that time, my father suddenly got sick seriously. My mother had to stay with him in the hospital for a month. When they returned from the hospital, __17__ of them looked very pale(苍白的).

After they were back, every day in the morning and evening, my mother helped my father __18__ slowly on the country road. My father had never been so gentle. It seemed that it was their most harmonious period. The sun gently shone among the leaves. All of these made up the most beautiful __19__ in the world.

The doctor had said my father would get well in two months. __20__, after two months he still couldn't walk by himself. All of us __21__ him.

"Dad, how are you feeling now?" I asked him one day.

"Lily, don't worry about me," he said gently with a smile on his face. "To tell you the truth, I just like walking with your mum." Reading his __22__, I know he loves my mother deeply.

Once I thought love meant flowers, gifts and sweet kisses. But from this experience, I understand that love means a lot. It's about the simple things they do for each other every day. It's about the way they support each other __23__ difficult times. It's about the way they take care of our family. I realise that love doesn't have to be flashy or romantic to be real. Sometimes, the most meaningful love is found in the __24__ acts of kindness. It's just like a thread in the quilt of our life. Love is inside, making life __25__ and warm.

( )11.	A. speak	B. talk	C. chat	D. say

三、阅读理解(本题共20小题;每小题2分,满分40分)

第一节　请认真阅读下列短文,从短文后各题所给的A、B、C、D四个选项中,选出最佳选项。

A

As a country strong in Maths, China has many folk games filled with Maths wisdom(智慧). You may have played many of them before. Let's take a look at three of them.

● **Luban Lock**

Luban Lock was first made by Lu Ban about 2,000 years ago. It is said that Lu used six wooden pieces to make a toy that looks like a lock for his son. The lock has a lot to do with solid geometry(立体几何). It's hard to take the six pieces apart. However, it is usually easier to unlock a Luban Lock than to put it back together. Now, there are Luban Locks made up of nine or more pieces.

● **Huarong Pass**

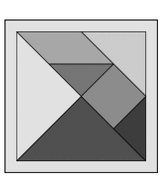

Huarong Pass is a traditional Chinese block-moving puzzle(智力游戏). Every block is named after a character in the book *Romance of the Three Kingdoms*, like Cao Cao, Zhang Fei and Zhao Yun. To win the game, players have to move the blocks to get "Cao Cao" out. This is a test of one's Maths knowledge, for example, in geometric area. It takes at least 81 steps to set "Cao Cao" free.

● **Tangram**

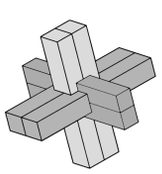

A tangram is a puzzle made up of seven pieces of different shapes, including triangles, squares and parallelograms(平行四边形). For each puzzle, players need to use all the pieces to make a shape. People can make shapes of animals, people, or things. To do it, they have to know about geometry. According to *China Science Daily*, the game was popular in the Ming and Qing Dynasties. In the 18th century, the tangram was brought to the West and soon became popular there.

(　　)26. Which picture shows the toy of Tangram?

A. 

B. 

C. 

D. 

(　　)27. Which of the following sentence is TRUE according to the passage?

A. It takes at most 81 steps to set "Cao Cao" free in Huarong Pass.

B. Tangram is popular in both China and Western countries.

C. Players need to use some of the pieces to make a shape in a tangram.

D. It is usually easier to put a Luban Lock back together than to unlock it.

(　　)28. Which part of a magazine is the passage most probably taken from?

A. Language.　　B. History.　　C. Maths.　　D. Art.

B

Derrick Downey was relaxing on his balcony in Los Angeles when a squirrel suddenly appeared. They stared at each other for a few seconds, and then the man asked the squirrel, "Do you want something to eat?" "It seemed like he did, so I told him, 'Stay here. I'll be right back.'" Downey recalled(回忆).

Downey found some peanuts in his kitchen and hurried back to the balcony. The squirrel was still there, so Downey thought he was listening to him. When he held out his hand with the peanuts, the squirrel pulled his hand closer and started eating. Downey had been feeling down, and this special meeting cheered him up.

Since that day in 2020, the squirrel has continued to come to Downey's balcony for treats. Sometimes, he brings his friend there. Downey named the pair Richard and Maxine. He shared a video of himself feeding and talking to the squirrels. The video went viral(走红) quickly. Some called him the best "squirrel dad". Some compared him to Snow White. "You're like a Disney princess," they wrote.

Downey was excited that his social media followers liked the squirrels as much as he did, so he started posting daily videos of Richard and Maxine. In a recent one, he tried to teach Maxine a lesson. "You're not always going to have the best of days," he said. "When life is down, don't put too much pressure on yourself."

Downey has also built a house for the squirrels. He encourages his followers to join him in decorating it. He has received paintings, tiny furniture, houseplants and even a working mini-TV. The man said he didn't expect to attract so many people with his squirrel videos. He has always loved animals, and he was just following his heart. As time went on, the squirrel house on Downey's balcony became a wonderland. The followers continued to send different things to decorate the house.

The story of Downey and the squirrels also began to spread beyond social media. Local schools started using it as an example in their environmental education classes, teaching students about the importance of animal protection and kindness towards all living beings. Downey was invited to speak at some of these schools. And as for Richard and Maxine, they continued to bring joy and wonder to Downey's life, reminding him every day that even the smallest acts of love can have a huge impact(影响).

(　　)29. Why was Downey invited to speak at some schools?

A. Because he gave some food to the squirrels.

B. Because he made videos of the squirrels.

C. Because he built a house for the squirrels.

D. Because he showed great love for the animals.

(　　)30. Which is the RIGHT order according to the passage?

a. The squirrel started eating peanuts.

b. Schools used Downey's story as an example in their classes.

c. A squirrel came to Downey's balcony.

d. Downey began to post daily videos of the squirrels.

e. The followers helped Downey decorate the squirrels' house.

A. c—b—a—d—e　　B. c—a—d—e—b

C. a—c—d—e—b　　D. d—a—c—b—e

(　　)31. What can we learn from the passage?

A. The squirrel came to Downey's house with his friend every day.

B. The squirrels didn't like the house on Downey's balcony.

C. People can see Downey talking to squirrels in the video.

D. The students continued to bring joy and wonder to Downey's life.

(　　)32. What is the best title for the passage?

A. The squirrel "dad"　　B. The popular squirrel videos

C. Lovely squirrels　　D. Downey's balcony

①When you go to the park, you might notice many older people listening to audiobooks(有声书) instead of reading paper books. Audiobooks have become quite popular these days. Why are more and more people choosing audiobooks over traditional books? Is listening to an audiobook just as good as reading a book?

②Reading needs us to focus all our attention on the words in a book, and we also need to find time and a place to sit down and read. However, you can listen to audiobooks anytime and anywhere you like, and it gives your eyes a break too. That's why people like audiobooks better.

③But the big question is, do we get knowledge from audiobooks as effectively as we do from paper books? Scientists did an experiment to find the answer. Volunteers in Group One were asked to listen to an audiobook while volunteers in Group Two read a book of the same content(内容). The result showed that the volunteers remember the same amount(量) of information, whether they listened to it or read it.

④Another study published in *Journal of Neuroscience* further supported the result above. In the study, researchers scanned(扫描) people's brains when they listened to and read books. The result showed that listening to audiobooks activates(激活) almost the same parts of the brain as reading does.

⑤However, some people still believe that they learn better from reading paper books. One reason might be that when we listen to audiobooks, we are often multitasking(处理多个任务). "If you're trying to learn while doing two things, you're not going to learn as well," Daniel Willingham, a professor of psychology at the University of Virginia, told *The New York Times*.

( )33. What do we know about the study published in *Journal of Neuroscience*?

A. People learn better from reading paper books.

B. People need to read and listen to books at the same time.

C. People get as much information from audiobooks as from paper books.

D. Listening to audiobooks activates different parts of the brain from reading does.

( )34. What does the underlined word "effectively" mean in Chinese in Paragraph 3?

A. 有效地　　B. 同样地　　C. 清晰地　　D. 快速地

( )35. Why do some people believe they learn better from reading paper books?

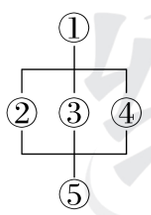

A. Because paper books are more interesting.

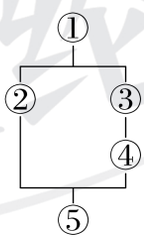

B. Because they can listen to audiobooks later.

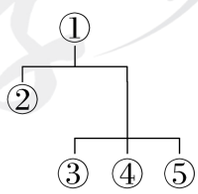

C. Because they can focus better on paper books.

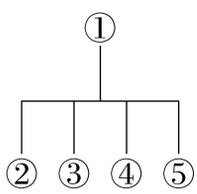

D. Because they can do other tasks at the same time.

( )36. Which shows the best structure of the passage?

A. 

B. 

C. 

D. 

D

The development of artificial intelligence(AI) has brought great changes to our lives. AI is being used in different fields, such as education, healthcare and transportation(交通).

In education, AI offers personalised learning experiences. By analysing(分析) a student's learning style and progress, AI systems can recommend suitable learning materials and activities. This can help students learn better.

In healthcare, AI is a powerful tool. AI can help doctors diagnose(诊断) diseases more correctly and quickly. By analysing large numbers of medical data, AI systems can make predictions that may be difficult for human doctors to notice. For example, AI can analyse medical pictures, such as X-rays and MRIs, to find signs of diseases like cancer and heart disease.

In transportation, the development of self-driving cars powered by AI is amazing. Self-driving cars use sensors(传感器) and special rules to drive on roads and avoid things in the way. This technology can help reduce traffic accidents and improve transportation efficiency, making our

journeys safer and easier.

However, the development of AI also brings some challenges(挑战). One of the main challenges is that it might take people's jobs as AI systems become better. Another challenge lies in the legal issues. For example, if an AI system makes a mistake, who is responsible? We need to make laws to make sure that AI is used for good and not for harm.

Even though there are challenges, AI will keep developing. As technology gets better, we need to find ways to deal with these challenges and make sure AI is developed and used in a good way. In a word, AI is a double-edged sword that holds great promise but also requires careful management.

( )37. Which of the following can AI do to help students learn better?

A. AI gives them more homework.

B. AI offers them the same material.

C. AI helps them get high scores in their exams.

D. AI recommends a book to them according to their interest.

( )38. What will the transportation be like in the future?

①There will be fewer traffic accidents.

②It will be difficult for people to travel.

③There will be no traditional cars on the road.

④There will be more traffic laws about self-driving cars.

A. ①② B. ①④ C. ②③ D. ②④

( )39. Which of the following is TRUE according to the passage?

A. AI is responsible if its system makes a mistake.

B. AI will keep developing and be used in a good way.

C. AI can analyse medical pictures to treat heart disease.

D. AI can only be used in education, healthcare and transportation.

( )40. What does the passage mainly talk about?

A. The changes in our lives. B. The challenges of AI.

C. The changes and challenges AI brings. D. The future of AI.

第二节 请认真阅读下面短文,从短文后所给的六个选项中选出五个可以填入空白处的最佳选项。

Have you dreamt of taking a flying taxi to the airport, or jumping over crowded city streets at rush hour, getting where you want to go far faster than you could in a car. You might be able to do these things in an air taxi sooner than you think.

An air taxi is something like a helicopter(直升机) that can carry people from place to place. Air taxis don't need a long runway like planes do. __41__

In June, the government of America agreed to allow a company called Joby Aviation to start

testing their new air taxi. This is the first time they have tested a taxi that has been built in a factory. Before that, all their taxis were made by hand.

__42__ It created a programme to fly people from their homes to the airport. Joby also expects their air taxis to provide a ride-sharing service. Just like you might order a car to pick you up, you could use an app to order an air taxi. Joby's air taxis will be flown by a pilot, and can carry four other passengers.

__43__ The company expects to charge about $3 a mile at first. But over time, they hope to bring the price down to less than $1 a mile. __44__ They think air taxis may be quieter than helicopters, but they will still add noise and traffic to our skies.

It seems that air taxis will be part of the future of travel. __45__ Governments need to make rules about where, when, and how these taxis can fly.

A. They can go straight up and down.
B. Some people have worries about air taxis.
C. The company hopes air taxis can start carrying passengers(乘客).
D. You will be able to order an air taxi on your smartphone.
E. But there's still a lot to do before air taxis become popular.
F. Joby says their air taxis are cheaper than helicopters.

41. _____ 42. _____ 43. _____ 44. _____ 45. _____

"I still remember my parents always arguing with our neighbours." When Liu was eight, her mother, Liu Hongmei, began taking __49__ (she) to bigger cities like Beijing to learn from well-known musicians.

They would take the late train and arrive in Beijing in the middle of the night. __50__ (save) money, they would rest in the underpasses(地下通道) of Chang'an Street until it was time for her lesson the next morning.

Things got better from the __51__ (two) year of middle school. Liu __52__ (final) had a regular teacher, the famous *suona* player Liu Ying. Liu Ying taught her for free until she got into

Shanghai Conservatory of Music after __53__ (complete) high school. That was a new start! She picked up new skills and gained a __54__ (far) understanding of *suona*. It was not the most popular instrument among students of her age, but she was proud to play it.

Liu has performed(表演) at many big events. One of the most unforgettable was when she performed with the famous composer Tan Dun in Australia in 2017. She played the most famous *suona* piece—*Birds paying homage to the Phoenix*(《百鸟朝凤》) and surprised the Sydney Opera House with __55__ (cheer) bird-like sounds. On October 15, 2024, she played the piece again in France.

Those sounds should be heard by more people. For that goal, Liu has tried many new ways to mix *suona* art with modern music. "I believe in being open-minded and trying new things," she says.

六、阅读与回答问题(本题共 5 小题;每小题 2 分,满分 10 分)

请认真阅读下面短文,并根据短文内容回答问题。

Face changing, or *Bian Lian* in Chinese, is an important part of Sichuan Opera. It started about 300 years ago. And it is one of the greatest treasures in traditional Chinese culture. The changing faces show different feelings of actors in a special way.

People think face changing has something to do with fighting against dangerous animals. In old times, when people met with dangerous animals, they painted colourful pictures on their faces to scare the animals away. Later, people used this in the shows of Sichuan Opera. And as time went by, it turned into a great form of art.

Face changing is one of the most mysterious(神秘的) arts, and only the masters really know how it works. Many people are interested in the secret of face changing. Generally, there are three face changing skills:

Mopping(抹脸). The performer mops out the colourful greasepaints(油彩) which are hidden in a certain part of his face to change his facial appearance when necessary.

Blowing(吹脸). The performer blows powder(粉) hidden in his hands or a small box on the stage so that it blows back onto his face following with his move.

Pulling(扯脸). The performer can pull down a mask which has been hidden on the top of his head, changing his face into colours like red, green, blue or black to show happiness, hate, anger or sadness. This skill is so difficult that the performer must move quickly and smoothly to achieve the amazing effect.

Face changing is an ever-changing art, and it keeps developing with modern science. By the early 1900s, artists could change up to 3 masks each performance. By the 1990s, artists could change up to 4 masks. And by 2000, the number rose to 8. Nowadays, using silk masks and modern science, artists can change 18 to 20 different masks.

66. When did *Bian Lian* start?

_____

67. Why did people paint their faces in old times?

_____

68. What can the performer do to show their different feelings when pulling down masks?
